PRODUCT FEATURES

TRACK SEPARATION
Load tracks from your music library to the DDJ-FLX10 as normal, then manipulate one, or any combination, of the vocals, drums, and inst (other instruments) to create live remixes and mash-ups. You can even choose specific track parts to apply effects to.

EXPANDED ON JOG DISPLAY
Customize the information you see on the jogs so there's no need to take your eyes off the decks. Choose from 4 modes, some of which show 3Band Waveforms (rekordbox only), and keep an eye on Mix Point Link and rekordbox vocal position analysis information, as well as Performance Pad status.

MIX POINT LINK
Create slick musical progression in your sets by linking mix points in tracks so the next song kicks in automatically at the perfect moment.

DMX OUTPUT FOR REKORDBOX LIGHTING
Connect DMX-compatible lighting equipment directly to the controller and use rekordbox to create custom lighting effects, or set the software to automatically adapt the color and movement of the lights to progress with the music. There's no need for an external DMX interface.

EVOLVED MAGVEL FADER
Improved from the 2-sensor system on the DDJ-1000, the MAGVEL FADER on the DDJ-FLX10 uses a 4-sensor system. This allows you to make the tiniest volume adjustments, no matter how small the movement of the crossfader, enabling more musical performances.

REKORDBOX AND SERATO DJ PRO COMPATIBILITY
The DDJ-FLX10 offers free plug-and-play compatibility with rekordbox and Serato DJ Pro, giving you hands-on control of your favorite software application. DVS support is available for rekordbox via selected subscription plans, and for Serato via a paid license/subscription to Serato DJ Expansions or Serato DJ Suite.
