Visit the official Serato DJ Pro website for the software's specifications: serato.com/

PRODUCT FEATURES

BRAND-NEW DESIGN

Get hands-on with an interface designed to emulate 2 x PLX turntables and a DJM-S series mixer – the kind of setup used by pro battle DJs.

TRACKING SCRATCH

The Tracking Scratch feature silently takes the music back to the cue point the moment you move the jog wheel from backward to forward or lift your hand away – making it easy to start having fun with scratching.

BATTLE-STYLE SETUP

The long tempo sliders run horizontally above the decks, while the Performance Pads are found in the mixer section so you can intuitively combine effects, trigger samples, and scratch your tracks.

MIXED MIC AUDIO

The output of the master audio is mixed with the sound from the Mic so you don't need a separate soundcard if you want to add vocals to your performance and route it through your computer. This means you can stream directly from Serato DJ Lite.

BIGGER JOG WHEELS

The bigger the jog wheels, the better for scratching. The jogs on the DDJ-REV1 are the same size as the ones on the DDJ-SR2, a popular controller that's higher up in the Pioneer DJ range.

SERATO DJ LITE INTEGRATION

Download Serato DJ Lite to your PC/Mac for free, then simply connect the DDJ-REV1 via the supplied USB cable and start DJing. You can also pay to upgrade to Serato DJ Pro if you like.
