DX164-W
REMOTE I/O EXPANDER

The DX164-W is a wall or floor mount expander for adding extra inputs & outputs to a dLive or SQ system. DX164-W features 16 high end, low noise microphone preamps with independent phantom power LED indicators, accompanied by 4 analogue line outputs on XLR.

The DX164-W can be powered by 100-240V AC on IEC or screw terminals and / or a 12V DC power source (e.g. for redundancy).

The DX164-W can be connected in redundant or cascade mode to fit any situation. The connection can be run over an L2 VLAN. A unique auto firmware matching feature keeps the DX164-W in sync with the rest of the dLive or SQ system.

The DX164-W is compatible with the dLive and SQ series.

Key Features

- 16 High end, low noise preamps

- Independent 48v indicator

- Auto firmware matching

- Ethernet L2 compatible

- AC or DC powered

Benefits

- Redundant connection & PSU

- Up to 46 expanders in a system

- Can be connected through a VLAN

- Power AC 100-240 IEC or screw terminal and / or DC 12V

- Fits standard 12" x 12" box
