

MA60

Half rack mixing amplifier, 60W @ 100 volt

The compact 9.5" MA60 mixing amplifier has an unseen intuitive user friendly interface and ground breaking logical rear panel. The unit comes with 1 mic/line input and 2 stereo line, mono summed inputs. On the rear you can find smart left-to-right 4 level priority system for audio routing, an emergency input, paging mic with chime and a 24VDC override output.

The design of the MA60 is a true redefinition of the mixing amplifier that goes back to the basics. Everyone will understand how to install or operate these units in a blink of an eye.

TECHNICAL SPECIFICATIONS

height- rack units (1U=44 mm)	ts (1U=44 mm) 2 depth (build in) in mm	240	
in U		power supply	100 - 240 VAC
depth (incl front) in mm	250	output power RMS 100 volts in watts dynamic output power 100 volts in watts	60
power consumption (max) in	100		
watts			60
output power RMS 4 ohms in	60		
watts		output power tappings	70 - 100 volts - 4 ohms
minimum impedance load in ohms	4	MIC inputs balanced	2
zone outputs	1	line input unbalanced	2
inputs with Phantom power	1	priority switch	2
tone control	yes	chime	yes
VOX mute	yes	priority output	1
emergency input	1	power amp topology	class-D
priority levels	4	cooling system	convection
frequency response (in Hz)	60 - 20 k	applicable low impedance	yes
applicable in 100V	yes		
Net weight product (kg)	2.6
