WAVES V3
DLIVE AUDIO NETWORKING CARD

The Waves V3 card (M-DL-WAVES) is an audio networking option card for the dLive series.

The Waves V3 card provides a 128x128, 96kHz interface for the Waves SoundGrid protocol on Cat5e cable.

The SoundGrid protocol allows use of Waves Plugins and interconnection with other SoundGrid-enabled devices. Soundgrid also allows a PC/MAC Ethernet adaptor to be used as a 128x128 audio interface.

The Waves V3 card is compatible with the dLive product range.

Key Features

- 128x128 channels at 96kHz

- Up to 100m connection

- Share audio thru multiple brands

- Use Waves plugins with low latency

Benefits

- 128x128 channel virtual soundcard

- Standard Ethernet

- Can run thru switches / VLANs
