

The OPTI Solar Sensory LED effects projector was manufactured specifically for the Sensory Market as a VAT exempt product with unique plug in sockets. The plug in sockets encourage interactivity with the projector as users have the ability to switch effects ON and OFF and START and STOP the effects wheel. The simplicity of the OPTI Solar Sensory LED allows users to innovatively create effects that are appropriate for any multi-sensory environment and are predominately used for relaxation, storytelling, reminiscence therapy and lighting therapy.

The OPTI Solar Sensory LED accepts all 6" and 9" (Max) effect wheels and can be used with a range of accessories to enhance your specialist lighting effect. From 2017 OPTI Solar Sensory LED projectors operate on an 'active gate' system, OPTI Kinetics rotators no longer have fiddly cables that need to be plugged into the side of projectors.

The projector is engineered to operate silently and efficiently that requires little maintenance. Designed and manufactured in the UK by OPTI Kinetics, the extended warranty from 1 to 3 years\* on its professional lighting projectors is a mark of assurance that OPTI Kinetics projectors are manufactured to the very highest specification.
