PRODUCT FEATURES

10.1-INCH TOUCH SCREEN
See everything clearly on the 10.1-inch screen, which is bigger and has a higher resolution and frame rate compared to the XDJ-RX2. And, with a fresh GUI and a host of new features, enjoy easier navigation for quick browsing and accurate mixing.
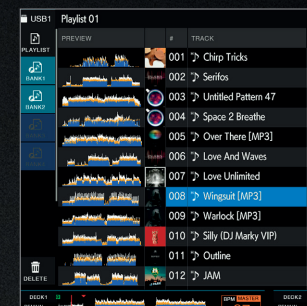

PLAYLIST BANK
Choose up to 4 playlists and add them to the new Playlist Bank. You'll then be able to access them all rapidly, giving you the option to quickly select tracks from different genres etc.

TOUCH PREVIEW
Listen to any part of a track you want to preview by simply touching its waveform in the relevant place in the browse section. There's no need to load the track to the deck.

COLOR ON JOG DISPLAY
Keep an eye on the playhead position and track artwork. The responsiveness of the wheel rotation has been improved compared to the XDJ-RX2 and you can change the 'weight' with Feeling Adjust.

RELEASE FX
Hit the Performance Pads to instantly change the energy of your performance, whether you want to add drama to a section of a track or create an exciting moment before transitioning to another song.

PLUG AND PLAY WITH REKORDBOX OR SERATO DJ PRO
Play rekordbox-analyzed music from USB storage devices via Export mode, or connect your laptop to use Link Export or Performance mode for free via USB-HID control. Serato DJ Pro support is coming in early 2022.
